

Quality First, Speed Always

About us

Our Core Values

Vision

To become the preferred integrated railroad company in India by delivering high quality reliable products and services, and setting high standards of performance in the field.

Mission

To provide superior products and services at the most competitive prices for development of Railway and Metro Infrastructure.

Goal

To provide one-stop solution for all railway and metro infrastructure requirements.

**“Every day is a journey,
and the journey itself
is home.”**

Rahee Group is one of the leading integrated railroad companies in India and has been operating in the field of Railways for over sixty years. The group specializes in construction of Bridges, Track Installations, Flash Butt Welding of Rails, Turnout Systems, Fastening Systems and Steel Sleepers.

Rahee is perceived as a resourceful group, that acts as a complete one stop destination for all the track requirements of railway, including supply, installation and commissioning. The group has several plants in India, manufacturing various track products for Railways. The plants are spread across the Eastern region of India, Kolkata and Southern region of India, Hyderabad. In addition, there are several infrastructure projects executed and under execution across India creating a pan India presence for the group.

Supplementing Rahee Group's expertise is a wealth of international experience in the form of its association with Pandrol Limited, UK for supply of resilient fastenings and other technologically advanced solutions for modern Metros/Railways. The collaboration has strengthened Rahee's position as a railway track leader in India.

Featuring quality materials, providing experienced and reliable services; Rahee satisfies the requirements with regards to innovation, cost effectiveness and performance. Quality and on time delivery are our core values and we strive to live by our motto "Quality First, Speed always". These values give Rahee an edge and are viewed as a great source of convenience by clients.

Bridges

Bridges of Excellence

**“The world’s most difficult journey is
smoothened by bridges, and a good bridge
can even conquer mountains.”**

Rahee undertakes Turnkey Bridge Projects with all forms of Sub Structure including pile, open, well foundation and Super Structure including open web, bow string, PSC, composite girder. The company carries out construction of both plate & triangulated truss girder bridges including HT Steel bridges for large spans. Rahee is approved by RDSO in Indian Railway, for manufacture and supply of riveted and welded steel girders for railway bridges.

Rahee bridge fabrication facilities located in Kolkata with area of over 200,000 sq. ft. are fully equipped with E.O.T Cranes, Hydraulic mobile cranes, Submerged arc welding machines, Hydraulic press, End Milling machines, CNC cutting machines, CNC coordinate drilling machines, Metalizing shop and all other modern facilities for girder fabrication and handling. Our works are well equipped by experienced and qualified manpower.

Rahee is involved in fabrication / erection of more than 50000 MT of Steel Bridges and construction of Concrete Bridges at various sites spread across India. Rahee has constructed Super-structure of bridges as long as 4.5 Km involving spans up to 123 m.

Major Work References:

Naraj Bridge across river Mahanadi: Fabrication and launching of 4300 MT of Web Through Steel Girders/Plate Girder of various spans (6 X 76.5m, 5 X 92.7m and 1 X 30). The project involves High Tensile steel also.

Ganga Bridge at Patna: Fabrication of over 35000 MT of Open Web and Triangulated girders. (Spans - 17 X 123m and 2 X 64m).

Bhramani Bridge at Angul: Foundation, Sub-structure and super structure work involving fabrication and erection of open web steel girder of over 3500 MT (Spans - 27 X 45.7m).

Sambhalpur Titlagarh doubling project: Foundation, Sub-structure and super structure work involving fabrication and erection of open web steel girder and composite girders of various size of over 7000 MT (Spans - 70 X 30.5m & 13 X 45.7m).

ROB constructed in West Bengal

Track

On Track Always

“To get through the hardest journey we need to take only one step at a time, but we must keep on stepping.”

Rahee made its foray in the track works field in 1998. Today the group undertakes turnkey projects involving:

- Flash butt welding of rails on track and off track
- Construction of Railway Sidings and Yards
- New Lines & doubling of tracks
- Gauge conversion of tracks
- Improvement of track structures
- Construction of Ballastless Tracks for Metro Railways

Track installation in Nagpur Metro

Rahee undertakes Turnkey Track Works projects involving ballasted & ballastless construction. The company's teams of well-qualified welding experts use some of the best Mobile Flash Butt Welding equipment to deliver high quality welds to the customers.

Rahee helps plan, build and improve railway sidings. The group has the capability to undertake turnkey railway sidings & yards development contracts. Our team of experts and associates can provide one stop solution for design, supply & installation of tracks for sidings.

Permanent way is the foundation for all railways and we supply and install track for all types of railway infrastructure projects. We work with customers on track renewals, gauge conversion and new projects for main line, mass transit and light rails.

The group envisions becoming one of the largest integrated railroad companies in India by delivering quality materials, providing experienced and reliable service, and offering unprecedented convenience in the field.

Turnouts

Leaders in Turnout Technology

**“Life is full of twists and turns
and no two directions are ever the same.
Yet our lessons come from the journey
not the destinations.”**

Rahee specializes in designing and manufacturing rail expansion joints, complete layouts, turnouts and turnout components like crossings and switch devices for railway tracks, including high-speed, heavy haul, urban and commuting railways, in all available rail profiles and required gauges as per international standards.

Rahee has been exporting turnouts and track products to various countries since the last twenty years and has an excellent export track record with the customers abroad. Rahee's products are in use with Bangladesh Railways, Malaysian Railways, Srilankan Railways, Saudi Arabia, Africa and several other railways around the world.

Dual Gauge Turnout installed in Bangladesh

With a team of highly qualified and experienced engineers, the group provides exceptional solutions and products to clients throughout the world.

RTT's Improved Rail Expansion Joint

Through modern engineering, exceptional quality and latest technology, Rahee guarantees efficient and competitive designs for a wide range of railway systems, along with a sustainable reduction in the cost incurred by superstructure maintenance and increased turnout availability.

Our Product Range

Turnouts: Heavy Haul Turnout Solutions | High Speed Turnout Solutions | Dual Gauge Turnout Solutions

Switches: Thick Web Switch | Standard Switch

Crossing: Heat Treated Welded Crossing | Swing Nose Crossing | Diamond Crossing | Fabricated Crossing

Special Track Work Components: Rail Expansion Joint | Glued Insulated Joint | Spring Setting Device | End Forged Rail

Fastenings

Bonding with the best

“Success is not a place at which one arrives but rather the spirit with which one undertakes & continues the journey.”

Rahee is a leading player in the field of Rail fastenings and Rail Pads in India. It has been manufacturing track products for over 60 years. The Group's innovative outlook has propelled the company from strength to strength.

Our Product Range

Rigid Fastenings: Track bolts | Spikes

Elastic Fastenings: ERC | Zero Restrain Fastening System | Anchors

Track materials: Fish Plates | Steel Clips | Base Plates | Rail Pads

Sleepers: H-Beam Steel Sleepers | Steel Channel Sleepers

*Rahee's Zero Restrain
Fastening System*

Rahee in its pursuit to deliver the best solution to its customers has also formed a Joint Venture with Pandrol Ltd of UK, the world leaders in elastic rail fastenings. The company manufactures and supplies one of the most advanced elastic fastening systems in the world.

Rahee possesses patent for Zero Restraint Fastening System (ZRF), a unique & innovative solution designed by the company to overcome the shortcomings of the present fastening system used by railways on bridges.

The Company's customers have the knowledge of Rahee's engineering personnel at their disposal for development of new systems or design of customer-specific products. Excellent staff potential together with outstanding technical knowledge ensures that customized solutions are put into practice within a short time.
